# 3 ways to meet the ASHRAE 62.2 ventilation requirements

ASHRAE 62.2 was developed to help protect the value of a home and the health of its occupants. Resideo has you covered, with a range of solutions to help maintain acceptable indoor air quality.

## Basic

### W8150 Fresh Air Ventilation Control + FocusPRO® TH5000 Thermostat

This solution offers basic ventilation control and meets most building code requirements. The W8150 reduces equipment run time by syncing ventilation calls with heating and cooling.

**Note:** the W8150 can be configured to meet ASHRAE 62.2-2010, but not 62.2-2013.

## Recommended

### VisionPRO® 8000 Smart

This cost-effective solution offers complete temperature and ventilation control. Wi-Fi connectivity provides access to weather data that can be used for dual fuel system control or ventilation lockouts without running additional wires.

## Premium

### Prestige® IAQ with Equipment Interface Module

This premium solution offers advanced control for more robust HVAC and IAQ systems, such as those with humidification and dehumidification. RedLINK™ accessories, including the gateway for access to the Total Connect Comfort app, help you provide total comfort and convenience.
