

UNIVERSAL DIGITAL OIL PRIMARY R7284U FAMILY

Intuitive Monitoring. Safer Control. Reliable Diagnostics.

Imagine a digital, universal primary control engineered to address and anticipate every industry need. Safely controlling and monitoring fuel oil ignition, the R7284 Oil Primary Controller delivers a host of new benefits. Each setting and diagnostic is displayed in easy-to-read text on a user-friendly screen — including actionable information presented in English, Spanish or French.

Universal Digital Oil Primary R7284U Family

Control You Need.
Expertise You Trust.

DETAILED DIAGNOSTIC INFORMATION

- Quick-fix digital display delivers clear data, fast
- Determines and displays why a lockout has occurred — lack of spark at the electrode, partially-functioning flame sense, line voltage dips and more

SIMPLE, STREAMLINED SET-UP

- Easy to operate
- Simple access to setup and diagnostic features — no external tools required

MULTI-FACETED MONITORING

- Monitor a variety of components outside of your controller, from cad cell and flame check to the voltage and igniter spark
- Displays faulty component in case of failure

CONSISTENCY AND CONTROL

- Select 15, 30- or 45-second safety timings and adjust valve-on and blower-off delays
- Compatible with virtually all oil-fired appliances

MEMORY AND ERROR HISTORY

- Keep track of system quality by accessing memory data for a day-to-day performance
- Baseline feature uses a cycle-trend reading, allowing for troubleshooting during service check-ups — before a no-heat call occurs

ENVIRACOM™ CONNECTION

- Able to fully integrate into any EnviraCOM communications system
- Remote monitoring with a simple 3-wire connection

ADDITIONAL FEATURES

- Recessed wiring pocket to allow more space in tight junction box installations
- Seamless integration with power venters without integral timers
- Engineered to be unmatched in compatibility
