

Be more comfortable — all around your home.

T10+ Smart Thermostat with RedLINK® 3.0

Why

A proven method for balancing comfort across your entire home.

How

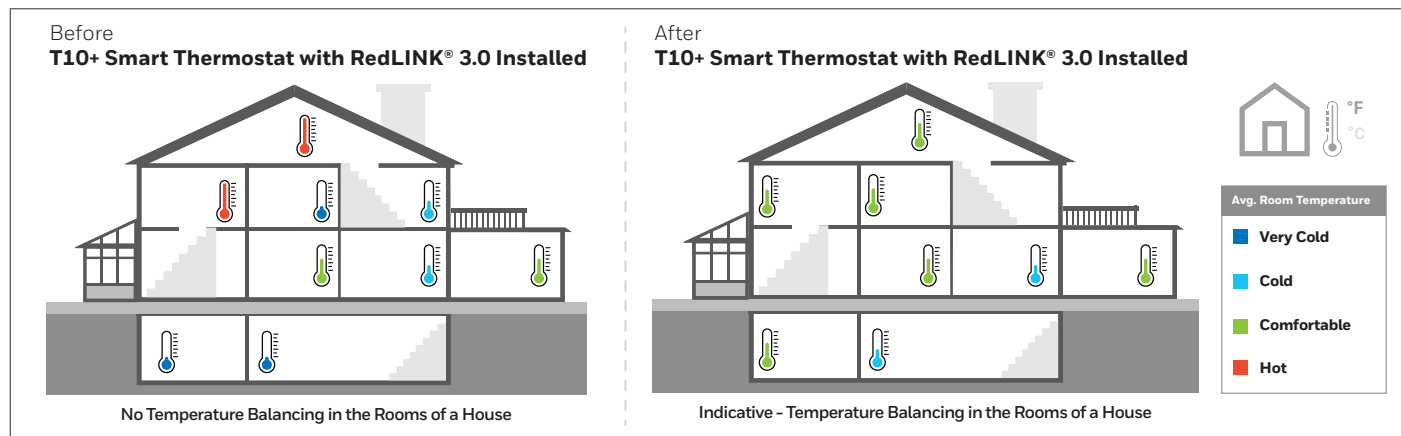

The T10+ smart thermostat with RedLINK® 3.0 combines advanced technology with remote sensors to adjust your temperature and blower fan settings to help balance comfort throughout your home. This is done by precisely circulating cooled or warmed air, which results in your desired temperature being balanced across your monitored rooms. The result is greater comfort with less energy use.

Too hot here. Too cool there.

Technology designed to answer this common concern.

You may know that feeling. When some areas of your home are too hot or too cold. Temperature balancing with the T10+ Pro Smart Thermostat may be the solution.*

* Results depend on a variety of factors, including the home's duct work and furniture placement.

Comfort control from anywhere

With the Resideo app, you can create and edit schedules, prioritize rooms and see smart alerts when the temperature goes above or below their set threshold.

App Advantages

Connect to a new kind of comfort.

- The T10+ thermostat connects directly to the home's WiFi network and adapts to your schedule and lifestyle.
- The geofencing feature uses smartphone location to automatically adjust for comfort when you are home and energy savings when you're away.
- The T10+ thermostat fully integrates with your favorite home brands, including Amazon Alexa, Apple HomeKit and Google Assistant.
