First Alert VX Series

A new era in home security

The VX Series video products deliver high-quality video, reliability, and premium performance. The video doorbell and outdoor camera complement Resideo's full portfolio of products, supporting expanded end-to-end smart home solutions to increase your RMR opportunities.

Looking after the things that matter

Your customers will say goodbye to false alarms and hello to notifications that matter most to them. With advanced event detection, VX Series products differentiate between people, packages, vehicles, and animals, so homeowners are notified about things that matter.

FOCUS on the customer

- Timely notifications ensure customers are always in the know
- Anytime, anywhere access with Total Connect 2.0 App for customers – easy to view live and recorded video
- Stylish and compact designs
- Day or night, color or IR night vision – a bright sunny day, or a pitch-black night, your customers will always have a clear view

FOCUS on your business

- Easy to install – offers flexible installation options
- Integration with ProSeries PROA7PLUS security panel increases sales at every installation
- AlarmNet 360™ subscription-based video storage plans for a variety of applications, large or small allow you to deepen your RMR stream

Beyond elevating security for your customers, subscription-based storage plans give you the opportunity to expand revenues.

	PLAN	ORDER ITEM	DESCRIPTION

A storage plan is required for the First Alert VX Series doorbell and camera.

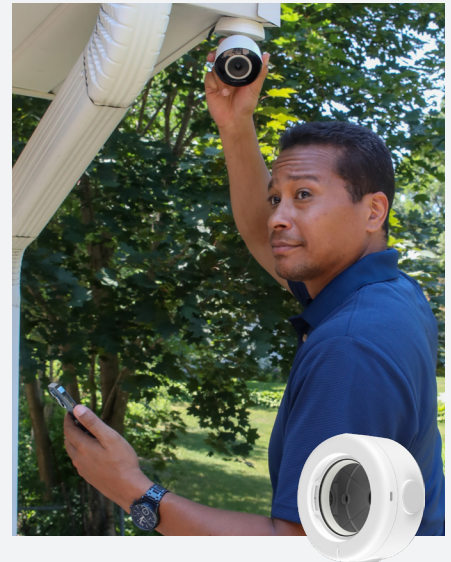

Advanced technology for advanced features

Create a security system that delivers protection, reliability and premium performance

First Alert HD outdoor camera

The outdoor camera offers a comprehensive set of video surveillance capabilities for the self-monitoring homeowner including color night vision, color night vision on-event, deterrent spotlight and siren. The camera features a high-resolution 2 MP image sensor with WDR (Wide Dynamic Range) for crisp and clear, live and recorded video, and looks great no matter the time of day.

For fast and reliable installation, the camera supports WiFi and Ethernet network connectivity and when Ethernet is not online, WiFi is used automatically, helping ensure that recording continues. Additionally, it can be powered by Ethernet (PoE) or AC mains power. The optional backbox helps with camera mounting by keeping cables safe and securely hidden, and it looks attractive on the home.

Optional CAMWE-WOBB
Use the backbox to hide
cables and connections

First Alert HD video doorbell

The video doorbell delivers advanced features, capability, and reliability that customers expect in their connected home. Homeowners can greet visitors, keep track of package deliveries, and monitor general activity outside the doorway from any location. With advanced event detection for meaningful notifications, the doorbell offers leading video quality and enhanced performance.

Along with general-purpose motion detection, the doorbell includes people, vehicle, animal and package detection. The sound detection feature can also alert homeowners to a loud sound outside the home.

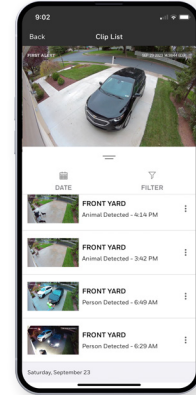

Dual-band 2.4 GHz and 5 GHz WiFi connectivity provides flexibility and range performance while simplifying the installation. The HD video doorbell includes a grey and white trim ring that blends well with existing home colors. It is made of a UV-resistant material, designed to prevent environmental wear in extreme weather conditions.

Anytime from anywhere access

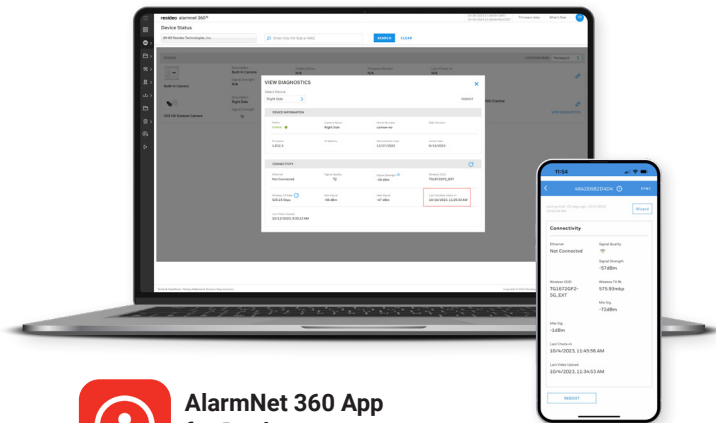

Total Connect 2.0

Stay connected with HD video viewing and advanced event detection

Homeowners use the Total Connect 2.0 app to view live video, video event clips, camera configuration details, and more. Using the TC2 app, homeowners can control their connected home – security system, locks, and other devices – through one easy-to-use app.

Resideo Total Connect 2.0 App for Homeowners

AlarmNet 360 App for Dealers

AlarmNet 360

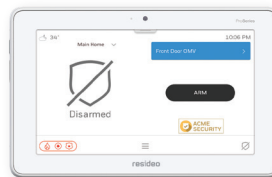

Manage customer accounts anytime from anywhere

The AlarmNet 360 app or website enables anytime, anywhere account support for the VX Series. Dealers can remotely create and manage accounts, troubleshoot, diagnose connectivity and configuration issues and more via a web browser, iOS or Android device.
