### APPLICATION

Commonly used in residential and commercial new construction, Jumper Kits serve as a temporary place holder for Pressure Reducing Valves in potable water systems. Using a Jumper Kit ensures Pressure Reducing Valves are not vandalized or stolen from unsecured or open job sites. Additionally, the Jumper Kit allows plumbing and piping to be tested for leaks and flushed prior to the installation of Pressure Reducing Valves. Resideo's DS06-JK-10\*-LF Jumper Kits are compatible with both Resideo's DS06 and FK06 Pressure Reducing Valves.
