

TrueDRY™ DR90 Dehumidification System

This is a legacy product document supported by Resideo. It is no longer manufactured.

Honeywell

Every homeowner is looking for increased comfort and energy efficiency, and with Honeywell TrueDRY™ DR90, you can offer both. Perfect for larger homes, TrueDRY DR90 efficiently removes excessive moisture from the air each day. In addition to dehumidification, TrueDRY DR90 also features an integrated ventilation control that introduces fresh, filtered air into the home as stale air and excessive moisture is removed. If you want to provide your customers with true comfort, use TrueDRY DR90 on your next job.

TrueDRY™ DR90 Dehumidification System

ALL-IN-ONE DEHUMIDIFICATION, VENTILATION, AND FILTRATION

Integrated Solution —

Can be centrally ducted for whole-house control or operate unducted to address moisture problem areas such as attics and crawl spaces.

Built-in Ventilation —

Introduces fresh, filtered air into the home while removing stale, moist air, which allows you to meet local ventilation building codes.

Built-in Level —

Ensures a fast installation that is correctly aligned to drain moisture efficiently.

High-Performance Moisture Removal —

Rated to remove 90 pints of water per day from the indoor air.

Automatic Water Removal —

Integrated drain port discards water automatically, eliminating having to empty water buckets.

Intuitive Wiring —

Simplifies installation and provides options for operation.

MERV 11 Air Filtration —

Extends performance and efficiency of unit and provides your customers with improved indoor air quality.

Easy maintenance —

Magnetic, corrosion-resistant service door ensures a tight cabinet seal, making maintenance quick and easy.

Core Technology —

Pre-cools the air to reduce operational strain on refrigerant coils. Uses less energy (6.7 amps) while removing more moisture than comparable competitive models.

Eco-Friendly —

Uses R-410A Refrigerant

Energy Star Rated

Part Number	Description	Home Size	Humidity Removal*	Application	Key Features	Refrigerant
DR90A1000	90-pint dehumidifier with no control	2,800 sq. ft.	90 pints per day at 80°F, 60%RH	Single homes, multi-family homes and larger homes	Energy Star Rated, built-in ventilation port, pre-core technology removes more water using less energy	R-410A
DR90VPIAQ	90-pint dehumidifier with VisionPRO IAQ control
