

Ultraviolet Air Treatment Systems

When it comes to improving the indoor air quality in your home, Resideo can help you see the light. When installed in your heating & cooling system, a Honeywell Home Ultraviolet (UV) Air Treatment System zaps live airborne particles and germs passing by the lamp, to help prevent them from moving from your duct system into your home's air. The shortwave lights are easy for contractors to install in your system, and the long-life lamps are simple to replace when needed.

Ultraviolet Air Treatment Systems

An Affordable Solution For Improving Indoor Air

The Honeywell Home AirBRIGHT Ultraviolet Air Purification system works within your home's ductwork to reduce airborne particles while ultraviolet light addresses surface contaminants such as germs, mold, mildew, bacteria, and viruses. Adding the UV product into your home's HVAC system allows you to enjoy better indoor air quality in your home.

Two models available - UV-only or UV plus carbon

AirBRIGHT 2 Ultraviolet Air Purifier

AirBRIGHT 6 Ultraviolet Air Purifier with Carbon

Accessories

Replacement UV bulb for AirBRIGHT 2

Replacement UV bulb for AirBRIGHT 6

Replacement carbon strips

Key Features

- Always-on UV light inactivates airborne and surface contaminants like mold, bacteria, and viruses
- Helps deactivate viruses, bacteria, and mold spores
