## **ARCHITECTUAL AND ENGINEERING SPECIFICATIONS**

## CO250B

The carbon monoxide alarm shall be a BRK Model CO250 and shall provide at a minimum the following features and functions:

- 1. An electrochemical CO sensor.
- 2. The unit shall be capable of self restoring.
- 3. The unit shall have an "End of Life" signal. This signal should be capable of temporarily being silenced for up to 2 days. After about 2 days, the signal will resume. After about 2-3 weeks the signal cannot be silenced.
- 4. Powered by a supervised 9V battery and a solid state piezo horn rated at 85dB at 10 ft.
- 5. A visual LED power-on indicator to confirm unit is receiving power or is in alarm.
- 6. A full function test button. The test button should check all alarm functions by stimulating the chamber to simulate a CO condition, causing the unit to alarm. Model CO250 also has a silence feature to silence unwanted nuisance alarms.
- 7. A tamper resistant locking pin that locks alarm cover to prevent removal of battery.
- The CO sensor is adjusted not to detect CO levels below 30 PPM and will not alarm when exposed to constant levels of 30 PPM for 30 days. It will alarm at the following levels: 400 PPM CO between 4 and 15 minutes, 150 PPM CO between 10 and 50 minutes and 70 PPM CO between 60 and 240 minutes.
- The unit shall be capable of operating between 40°F (4°C) and 100°F (38°C) and relative humidity between 10% and 95%.
- 10. The unit shall contain mounting hardware and shall be listed for wall or ceiling mounting.
- 11. The unit shall at a minimum meet the requirements of UL2034, NFPA 720, NFPA 101, ICC.
